Remuneration to senior executives

Following a proposal from the Board of Directors, the AGM 2016 reached a resolution regarding guidelines for remuneration to senior executives.

The guidelines for remuneration and other terms of employment applying to management mainly imply that the Company shall offer its senior executives remuneration on market terms, that this remuneration shall be determined by a dedicated Remuneration Committee governed by the Board of Directors, and that the criteria for remuneration shall be based on the responsibilities, role, competence and position of the relevant senior executive. Remuneration to senior executives is decided by the Board of Directors, excluding any Board members affiliated to the Company and management. The guidelines shall apply to new agreements, or revisions to existing agreements reached with senior executives after the guidelines were determined, and until new or revised guidelines have become effective.

Senior executives shall be offered fixed compensation on market terms and based on the managers' responsibilities, role, competencies and position. Fixed compensation shall be reviewed annually.

From time to time, senior executives may be offered variable remuneration. Such variable remuneration shall be on market terms and be based on the outcome of predetermined financial and individual targets. The conditions and basis for calculating variable remuneration shall be determined for each operational year. Variable remuneration is paid out during the year after earning, and can be paid as salary or as a lump-sum pension premium. In the event of payment as a lump-sum pension pre-

mium, there is some indexation so the overall cost to NeuroVive is neutral. The basic principle is that the annual variable portion of pay may be a maximum of 30% of basic annual salary. Total variable remuneration to senior executives may not exceed SEK 1,500,000.

When determining variable remuneration to management payable in cash, the Board of Directors shall consider introducing restrictions that:

- make payment of a portion of such remuneration conditional on the sustainability of the results on which the earnings are based, and
- allow for the Company to reclaim compensation that has been paid on the basis of information that is later shown to be manifestly inaccurate.

Senior executives are entitled to pension solutions on market terms in accordance with collective agreements and/or with NeuroVive. All pension commitments shall be premium-based. Salary differentials can be utilized to increase pension provisions through lump-sum pension premiums, provided that the total cost to NeuroVive remains neutral.

The CEO has a maximum notice period of six months from NeuroVive's side and the maximum notice period for other senior executives is six months. The notice period is a minimum of six months from the CEO's side and the minimum notice period is three months for other senior executives. In addition to the notice period six months, the CEO will receive severance pay equal to six months salary and fringe benefits.

The Board of Directors is entitled to depart from the above guidelines if the Board considers there are special reasons to justify such departure in individual cases. Variable remuneration of SEK 725,669 was paid to senior executives in 2016, within the framework of the guidelines.

The Auditor has presented a statement to the AGM 2017 relating to whether the Board of Directors followed the adopted guidelines for remuneration to senior executives in 2016. The Auditor's statement concludes that NeuroVive followed the guidelines. The Board of Director proposes that remunerations for 2017 are decided in accordance with the proposal on pages 21-22.

Internal controls over financial reporting

The Company's control environment consists of collaborative initiatives between the Board of Directors, the Remuneration and Audit Committees, the CEO, the CFO, internally appointed staff and the Company's Auditor. Control is also exercised through the reporting procedures adopted in the Company's finance manual, including financial reporting to the Board of Directors, and a yearly report to the Board of Directors on completed internal control procedures.

The Audit Committee performs quarterly reconciliation with the company's CEO and Auditor. In addition, the documentation produced for Management's evaluation of the company's internal control is reviewed and evaluated annually.

Risks assessment includes identifying risks that may arise if the fundamental standards of financial reporting in the group are not satisfied. A review takes place to ensure that the Company has an infrastructure that enables effective and expedient control, and an assessment of the Company's financial position and significant financial, legal and operational risks. The company identifies and evaluates the risks on a regularly basis, that may arise, in a risk assessment model.

Pharmaceuticals development is associated with risks and is a capital-intensive process. The risk factors judged to be of particular significance to NeuroVive's future progress are the outcome of clinical studies, measures taken by regulatory authori-

ties, competition and pricing, collaboration partners, liability risk, patents, key staff and future capital requirement.

Control activities limit identified risks and ensure accurate and reliable financial reporting. The Audit Committee and the Board of Directors are responsible for the internal control and monitoring of management. This is achieved through internal and external control activities and by reviewing the Company's constitutional documents governing risk management. The results of internal controls are compiled and a report presented to the Board of Directors and the Audit Committee annually.

Information and communication

The Company has information and communication paths intended to promote the accuracy of financial reporting and ensure reporting and feedback from operations to the Board of Directors and management, through means including constitutional documents such as internal policies, guidelines and instructions relating to financial reporting being made available and presented to the relevant staff.

Monitoring

NeuroVive monitors the observance of the Company's constitutional documents and routines relating to internal controls. Management reports to the Audit Committee on internal controls at each meeting.

The Board of Directors is regularly updated on the Company's financial position and profit/loss against budget as well as on development projects in relation to the relevant project budgets. The CEO presents a written report at each regular Board meeting, or when the need arises, directly to the Board of Directors on the monitoring and status of the Company's ongoing projects and drug candidates.

Special evaluation of the requirement for internal audit

NeuroVive does not conduct an internal audit. The Board of Directors evaluates the need for this function annually and judges that, given the Company's size with relatively few employees and limited transactions, there is no need to institute a formal internal audit function.

Compliance with Swedish stock market regulations and accepted stock market practice

NeuroVive has not been subject to any ruling by Nasdaq Stockholm's disciplinary commission or statements by the Swedish Securities Council relating to breaches of Nasdaq's regulatory framework for issuers or good accounting practice on the stock market in the financial year 2016.
